# Building Department Services

CITY OF WESTLAND, MICHIGAN

As Michigan's tenth largest city, Westland has constantly maintained a business-friendly environment while excelling in superior customer service for its residents and developers.

Since 2011, McKenna Associates has provided inspection services to this vast community. Given the size of the community and volume of projects requiring inspections, McKenna inspectors have provided ample availability and flexible schedules to ensure no project is placed on hold due to a needed inspection. McKenna Inspectors provide a wide variety of inspection services to the City, including: Building and Trades (Mechanical, Electrical, Plumbing and Fire Prevention), Rental and Vacant Properties, Reuse and Re-occupancy, and State and Federal Grant Programs.

Our inspectors have remained up to date on all the required registrations, licenses, and certifications to ensure current code requirements and regulations are met.

City leaders, residents, and developers appreciate the thoroughness of McKenna's approach to providing inspection services, and are particularly pleased with the cooperative attitude and willingness of our inspectors to go the extra mile to perform inspections in a safe and timely manner.
